
An Introduction To Security Training

The confidence to plan, manage and deliver protective security within any organisation comes from an improved knowledge and capability gained from effective training

Covenant's team members have a wealth of knowledge and experience developed over long careers working within the UK and globally within the British military, law enforcement and the intelligence community.

Our consultants have all worked at a strategic and operational level delivering key elements of the UK Government's counter terrorism strategy focused on the protection of people and infrastructure and other vital business assets.

Our skills, knowledge and experience have contributed to the safety and security of people living and working within the UK and wider afield.

The team has been involved in a diverse range of protective security projects including the 2012 London Olympic Games, HM The Queen's Diamond Jubilee, the 2014 football World Cup and the protective security arrangements for people attending major public and military events within the UK. In 2015 we assisted the Tourism industry in Egypt and Tunisia.

The team has also provided our clients with a range of bespoke training services including table-top exercises to test plans, processes and procedures, a variety of safety and security courses, and presentations and workshops to meet the clients' needs. We are able to conduct training needs analysis to identify your security training requirements.

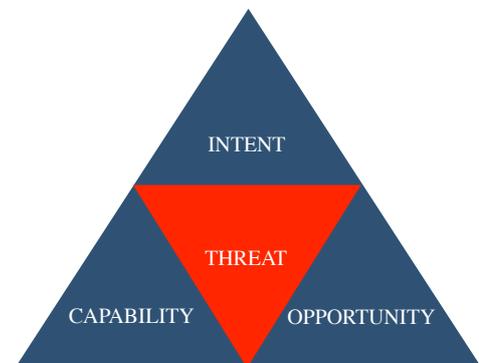

The Need For Training

We live and work within a business world that places high demands on the protection and safety of our staff, clients and customers and other assets within our working environments.

A key element to ensuring we benefit from the levels of protective security we require is to provide our managers and staff with focused training as part of their professional development. This training will instill confidence in their capability to meet today's and tomorrow's security challenges.

The threats and associated risks to people and businesses within the UK and across the world are continuously changing and evolving as those seeking to harm us and our way of life adapt their methodology to counter our responses. Today's business people, security managers and staff need to be provided with regular updates on how the organisations they represent could be targeted by a number of threat sources ranging from terrorism through to opportunist criminals. Covenant provides these services to meet your security training needs.

Consider these questions;

- Do we provide all of our staff with security awareness training?
- Do we provide our security staff with professional development training?
- Do we promote a healthy culture of security compliance within the business?
- Do we practice and test our emergency response procedures?
- What are the current and evolving threats to our safety and security?

We all have a duty of care towards our staff, our clients, our visitors and those whose welfare we are responsible for. At times of emergency we need to respond quickly and effectively to minimise the potential for harm and maximise our opportunities to recover. By doing so we can improve our resilience and reduce our attractiveness as a target. At Covenant our training courses are designed to help you achieve these standards.

‘Professional confidence comes from knowledge and knowledge comes from training’

Our consultants have designed a number of security training courses, awareness presentations and workshops that will enhance your security management and also your supervisors and staff confidence, professional knowledge and capability as part of their career and role development.

We are also able to determine your current training needs through consultation with you and thereafter, develop and deliver training sessions to meet your needs.

Covenant offers a range of security training services. We can determine your training requirements through our consultation process. Our training services include:

- Covenant’s ‘Bridging The Gap’ course for SIA licensed security officers
- A number of protective security workshops including;
 - * Developing an effective security plan
 - * Emergency evacuation planning
 - * Developing a security culture
 - * Understanding crime prevention
 - * Mail room security planning
- A number of awareness presentations for management and staff including;
 - * Active shooter awareness & response
 - * Responding to suspicious items
 - * Hostile Reconnaissance awareness
- Table top exercises to test and assess your response plans and emergency incident management plans.

All of our courses, exercises and workshops have been designed by Covenant security risk specialists.

Covenant is able to research, design and deliver bespoke protective security courses, exercises, workshops and presentations to meet your needs.

All of our training services are delivered by qualified and experienced security specialists who have conducted and led on operational security services and projects at the highest levels within the private and public arenas within the UK and wider afield.
